

**MRG**  
Premiere

# **TRADING RULES**

**LATEST UPDATE**  
**JANUARI 2021**

MRG Premiere is an International Mini Account Broker that has grown and developed for more than 10 years based on the guideline "BIG PROFIT & FAST TRADING".

Established under the company Maxrich Group Ltd. On September 29, 2009, MRG Premiere, based in Saint Vincent, Caribbean, served traders in Indonesia with the concept of Straight Through Processing (STP) orders to liquidity providers so as to provide transaction speeds as fast as demo accounts.

## MRG PREMIERE RULES GAME

### Several Types of Trading Accounts at MRG Premiere

### BRIEF DESCRIPTION

Types of trading instruments that are traded according to the offer (buy or sell) **start from micro account size (0.01 LOT)**

Example:

In **micro lots (0.01 LOT)**, one point of a currency pair based in US dollars is equal to \$ 0.1, compared to \$ 1 for trading mini lots (**0.1 LOT**) or \$ 10 for trading standard lots (**1 LOT**).

Some of the trading instruments available at MRG Premiere are as follows:

- **Forex**

Forex trading involves buying and / or selling one foreign currency against another. Forex trading is a market with a turnover of more than 4 trillion dollars a day and is available for trading 24 hours a day.

- **CFD's Stock Indices**

**Contracts for Difference (CFD)** is a Specialized and popular Over The Counter (OTC) financial product that makes it possible to easily take a wide range of market positions across a variety of different financial markets (Dow Jones, NASDAQ, S&P 500).

MRG Premiere also offers several stock indices that allow traders to trade their opinion on several US indices.

- **Comodity**

MRG Premiere offers spot contracts in Gold (LLG) and Crude Oil (WTI) commodities via the MetaTrader 4 platform.

### **MRG Premiere advantages:**

#### **1. ECN Type**

You will get smaller spreads and faster platform execution (no requotes).

#### **2. 1 Second Execution on Non Farm-Payroll and Other News**

MRG Premiere is the only broker in the world that provides real-time execution speed even only 1 second during Non-Farm Payroll and several other news.

#### **3. 10 Minute Deposit & 59 Minute Withdrawal**

MRG Premiere guarantees that deposits and withdrawals of profit will not have problems with the data records that you have provided are complete and correct.

#### **4. Automatic Order Fill**

All orders that you place / open at MRG Premiere will be directed directly to the Liquidity Provider (Saxo Bank) without any intervention from the *Dealing Desk*

Basic Consequences:

##### **1. Wrong Quote due to network damage or freeze**

- At this stage the client must agree about normal errors that may come periodically.
- Errors that are considered normal are the freezing price under 30 minutes.
- If more than 30 minutes of silent price MRG can seek the best win-win solution which will be checked first.
- The solution can be in the form of an annul or adjustment equity.

2. Wrong quotes in any form will be deleted, either detrimental or beneficial to the client
3. Each client is required to set pending limits (Stop loss and Profit Taking) as an effort to facilitate problem solving. If there is no evidence of closing a position in the journal or there is no limit order, then MRG Premiere has the right to take a policy not to provide compensation for something that cannot be proven.
4. If you experience an error, you must record it immediately and immediately report it to the administrator of MRG Premiere on WhatsApp 0877.7309.3999.

### **IMPORTANT INFORMATION TO KNOW RELATING TO MARKETS IN MRG PREMIERE**

#### **1. MARGIN DEPOSIT**

To open a **real account** at MRG Premiere, you need to make a deposit. The minimum deposit for each account applies the following rules

- \$ 50 for Recreation account
- \$ 1,000 for Professional account
- \$ 5,000 for Syariah account
- \$ 50,000 for the Signature account

#### **2. CHANGE PASSWORD WHEN OPENING A TRADING ACCOUNT FOR THE FIRST TIME**

When you first open a trading account, you will be given access to your account password by your admin and / or trading advisor. Please note that you **MUST REPLACE** the **PASSWORD IMMEDIATELY** with your choice of password of your choice which is certainly easy to remember. The following is a tutorial for changing the password for Meta Trader 4:

- Select "Manage Account"
- Select "Change Password"
- Select "Change Master Password"
- Enter Your Old Password & Enter a New Password (which is easy to remember)
- Click "Next"
- Done

#### **3. BID / ASK SPREADS**

The bid and ask prices of trading instruments on the platform are the prices of the **liquidity providers**. In abnormal market conditions such as before and after the release of major economic data, during periods of **volatile** market conditions or times of illiquidity and several other factors. The bid and ask prices also depend on the market opening, at the beginning of the Asian time zone, at the end of the New York time zone, as long as the value date changes, the spread may be wider.

#### 4. ORDER EXECUTIONS

All standard types of orders on the market are available on your MT4 platform, **namely market execution, limits and stops**. In addition to the Trailing Stops, where the Stop level moves in line with the market price and is supported for all types of Stop orders.

All **stop and limit orders** can be placed as:

- **Day Order** - this order can be categorized as an order that expires automatically at the end of the working day when the order is placed
- **Good Till Canceled (GTC)** - This order is adjusted to the conditions the order is still running until the cancellation is done manually.

#### 5. MARKET ORDER EXECUTION

Currently, the main method used to execute markets via the MRG Premiere platform is "**Market Orders Execution**". Market orders will always be listed at the current available price in a certain amount, but it should be noted in advance because it can result in **slippage**.

In abnormal market conditions such as before and after major economic news releases, it is said that market conditions are unstable. Trading transactions may not be executed at all (**off-quote**) due to the unavailability of the **Automatic Order Fill volume**.

#### 6. LIMIT / STOP ORDER

- Limit Orders for Forex & Gold are 2 points (last digit of the bid / ask price).
- Limit Orders for Index & Crude Oil will be given the following information:
  - Dow Jones: 1 point
  - Nasdaq: 2.5 points
  - S&P: 2.5 points
  - Crude Oil: 1 point

All pending orders (**Buy Limit, Sell Limit, Sell Stop, Buy Stop, Stop Loss and Take Profit**) will be executed by **market price**. For the record, there are some important confirmations for all pending orders, namely:

- Price terms are the same as client requests,
- Above the price according to the client's request, or
- Below the price as requested by the client

Other Important Notes:

MRG Premiere has the right to make corrections / cancellations of transactions according to the current price with the following conditions:

- An error occurs in special circumstances such as a highly volatile market either before or after a news release

- Occurs when a transaction is based on a Wrong Quote, for example an incorrect price when the market is running.
- All of the above provisions will be checked before taking action.

## 7. INTEREST / SWAP

**A interest / swap rate** is defined as the overnight interest or rollover (earned or paid) for holding positions overnight in forex trading. Each trading instrument has its own swap fee and is measured based on the volume used.

**A interest / swap rate** is subject to change depending on fluctuations in the country's main interest rate and can be calculated daily at the close of the New York market. In addition, there is an additional swap of three times the normal amount and occurs every Wednesday to compensate for the swap fee on Saturdays and Sundays when the **market is closed**.

## 8. ADJUST ROLL-OVER

For Customers with Syariah and Signature Accounts, there is an *Adj Roll Over Fee*. This Roll Over Adj is a replacement fee for Swap that is charged for Syariah and Signature Accounts, this fee is only charged for transactions that exist at the end of the month.

So if there are no transactions that are open at the end of the month to the beginning of the following month, this fee is not charged, so we recommend that for Syariah and Signature accounts, not to hold positions at the end of the month.

For the calculation method:

Roll Over Fee:

$(\text{Commission} \times \text{Lot}) + (\text{Spread} \times \text{Lot})$

Case Study:

- Open Sell EURUSD on 30 November at a price of 1.13736 (1 lot)
- Open Sell XAUUSD on the same date at 1222.85 (1 lot)

Then close on December 1st. Then,

Roll over fee in EURUSD:

- $(\$ 30 \times 1) + (8 \times 1) = \$ 38$
- Roll over fee at XAUUSD:
- $(\$ 30 \times 1) + (30 \times 1) = \$ 60$

## 9. LEVERAGE

The main benefit of the forex market is about offering the highest leverage (lowest margin) of various products. This means that all traders have the ability to trade in the global market which, incidentally, cannot be done in other financial worlds.

There are two types of leverage in MRG Premiere which will be offered to all clients:

- Leverage 1: 200 is available for Professional, Syariah and Signature Accounts
- Leverage 1: 500 is only available for Recreation Account

## 10. TRADE SIZES

The size for trading with the minimum size per transaction is 0.01 lot and applies to all trading instruments that have been quoted. Currently, the maximum number of lots on a trading transaction is 30 lots / entry.

## 11. HEDGING

Hedging / Locking is a situation where there are two opposite trading positions on the same currency pair. When this happens, the margin requirement for each position is calculated to be 50% of the normal margin requirement.

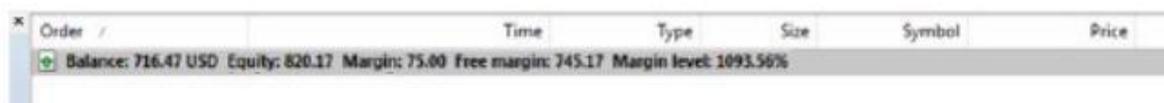

Example:

- Long position of 0.1 lot of EUR / JPY
- Short position of 0.1 lot of EUR / JPY

Normally, the margin requirement for both positions is \$ 100, but in this case, the value of the margin requirement for both positions is \$ 50

## 12. MARGIN CALL

Metatrader 4 will trigger a margin call when the margin level on the account reaches 100%. Margin levels can be found in the Trade tab menu in Metatrader4.

A screenshot of the Metatrader 4 interface showing account status. The status bar at the top of the window displays: Balance: 716.47 USD, Equity: 820.17, Margin: 75.00, Free margin: 745.17, and Margin level: 1093.56%. Below the status bar is a table with columns for Order, Time, Type, Size, Symbol, and Price.

Order	Time	Type	Size	Symbol	Price
Balance: 716.47 USD Equity: 820.17 Margin: 75.00 Free margin: 745.17 Margin level: 1093.56%					

## 13. STOP OUT (AUTO-CUT) LEVEL

Whenever the margin level reaches 30%, Metatrader4 will automatically close all trades to avoid bigger losses.

#### 14. TRADING HOURS

- FOREX

Trading day	Metatrader time, GMT +2
Monday - Thursday	00.05 - 24.00 *with maintenance break from 00.00 to 00.05
Friday	00.05 - 23.55 *with maintenance break from 00.00 to 00.05

- LLG (GOLD)

Trading day	Time (Metatrader time, GMT +2)
Monday - Friday	01.00 - 23.55 - *with maintenance break from 23.55 to 01.00

- US Stock Indices / Time (Metatrader time, GMT +2)

Trading day	Day	Time (Metatrader time, GMT +2)

Trading day	Day	Time (Metatrader time, GMT +2)
Crude Oil (CL)	Monday - Friday	at 01.05 - 22.55 - *with maintenance break from 22.55 to 01.05

#### UNDERSTANDING SPREADS & HOW SPREADS AFFECT YOUR TRADING

For example, if you look at the EURUSD chart it reached the price of 1.2600 (take profit for the short term) but your order did not stop or close, it is commonly known as the market spread. Please also note that the price on the chart is a bid price and not an ask price. In order for the take profit at 1.2600 to be achieved, the Euro-Dollar pair must hit the price at 1.2600 + the market spread. Meanwhile, to find out the stop loss number, the price must reach 1.2750 + the market spread.

If the spread is 2 points, then the take profit for the short term is 1.2602 with a stop loss when the price reaches 1.2752.

Now, what happens if the spread widens by +10 points?

Then the price is at 1.2612 so that the take profit will be obtained and can stop trading. Additionally, the price has to reach 1.2760 for the stop loss to be set.

Notes:

If a trader is still unsure about the Take Profit or Stop Loss point or level, it is advisable to make a decision to take or not before the provisions of the rules run, so it is advisable to contact MRG Premiere via WhatsApp to 0887.7309.3999.

We will be happy to receive and maintain the journal report and history of price tick on our server.

## **EFFECT ON THE MARKET GAP ON YOUR ORDER**

Sometimes, there are instances in the market where the price "jumps" from the close point to the open point. Futures prices for both Gold, Forex, & index will follow the real market price which is represented by the liquidity provider. So there are times when we hit 1187 on the 27th minute, it's done at a different price because at that minute the price jumps ticks. Especially if it is NON FARM PAYROLL or other Hyper News. With STP, your system can certainly be done at a Best Market Price like Indonesian Stocks without Requote, but the price must follow the market price.

So if you experience GAP in a trade, your done price will follow the last price. For example, you BUY STOP GOLD at 1270, while the price of running GOLD when you enter your Pending Order is at 1260. 5 minutes later the GOLD price suddenly jumps to 1275. So if your BUY GOLD Open Order is at the price of 1275, not at 1270 (even though you have a GOLD pending order at the price of 1270).

Just like other types of orders, be it BUY LIMIT, SELL LIMIT, SELL STOP, TAKE PROFIT, to STOP LOSS. The existence of GAP in the market which of course we cannot predict like a double edged sword for traders, can lead to big PROFIT traders, but also can cause traders to LOSS too. Therefore, you must be strict in implementing MONEY & RISK MANAGEMENT if you want to become a PROFITABLE trader.

Gema Goeyardi MM, CAT, CSA: Appeals to traders to be more careful when trading on Hyper News such as NON-Farm Payroll and so on. If you want to trade on events like this, it is necessary to know that the risk is entirely yours. Therefore, please make sure your internet connection is not interrupted and the device you are using is compatible with Meta Trader 4.

"We have the best deal in the planet with a platform direct to liquidity provider"

## **SPECIAL MARKET CONDITIONS AND FORCE MAJEURE**

MRG Premiere reserves the right to determine that there are emergencies or market conditions that are extraordinary and unpredictable. These conditions are included in the suspension or closing of the market.

However, MRG Premiere will use its best efforts to correct reproducible errors and defects in the standard MRG Premiere service.

### **1. Price Stopped Moving / SERVERS DOWN**

In exceptional market conditions or force majeure, for example, prices are suspended / frozen / server is down, MRG Premiere will only accept order liquidation.

The client must send a liquidation request to WhatsApp 0877.7309.3999 using the following format:

- Name:
- Email:
- Account Number:
- Error Documentation Video:

The liquidation price will be taken from the current price source from the liquidity provider (SAXO Bank).

Additional notice:

- When the price is frozen for no more than 8 minutes, the condition used is the last price before the freeze is used as the liquidation price.
- When the price is frozen for more than 8 minutes, the liquidation price will be taken from the liquidity provider (Saxo Bank).
- When there is an ongoing trading position that has not received the liquidation request, it will still be running before the current market price.
- When the price is stopped / the server goes down, all kinds of pending orders and new orders will be considered as canceled orders.

## **2. WRONG QUOTES / INCORRECT PRICE QUOTE**

When a transaction occurs based on a WRONG Order, for example an incorrect price, then MRG Premiere has the right to make corrections / withdrawals depending on the market price at that time.

## **3. ARBITRAGE TRADING**

MRG Premiere does not allow arbitrage trading. Arbitrage trading is considered exploitation, a violation of trade laws and would be unfair to clients. Therefore, arbitrage trading is strictly prohibited. MRG Premiere reserves the right to revoke arbitrage transactions and / or to the extent prohibiting clients who have arbitrated trading

All parties fully understand that trade orders and trade details are generated by the program and not by MRG Premiere. MRG Premiere is not responsible for any program errors or malfunctions including mechanical or communication line failures, system errors, pricing errors, freezing rates, data failures or any cause beyond its control. The Client acknowledges that any orders that have been executed during this condition will be considered canceled.

In addition, MRG Premiere is also not under any circumstances responsible for any indirect or consequential loss, including lost profits, loss of goodwill, or lost profit opportunities.

The Parties agree that the limits of liability contained in this clause have been subject to commercial and fair and reasonable negotiations with respect to the circumstances which were, or should have been, known or contemplated by the Parties regarding these trade terms.

If there is an issue or there is an important question, then don't hesitate to contact MRG Premiere if a trader has any questions or complaints. We will gladly reply with a Trading Journal Report and historical Tick Price from our server. Contact us on WhatsApp 0877.7309.3999
